lord of dragons

# Classic 3D MMORPG

At Lord of Dragons (LOD), we believe that games must be ‘fun to play’, before all things.

LOD is vastly different from other games that are mainly focused on ‘Earn’ element of P2E. We strive our games to be the one that players would continue to play just because it is fun to spend time with. Along with sustainable token-economics, we have prepared various in-game contents such as PvP, real-time weapon switching, core/light user loops, and many more to elevate the gaming experience.

PvP Siege Battles

lord of dragons

## Core • PvP Seige Battle

Siege Battle that moves your heart. 500 vs 500 real-time Siege Battle

- Strategic allocation required by weapon usage
- Various battle strategies and moves required to hunt monsters, players, and objects
- Many useful items can be acquired
- Real-time battle status report and communication via mini-map
- Attractive rewards for winning team

Weapon Switching

lord of dragons

# Real-Time Weapon Switching

- Playing multiple classes through single character
- Unique in-game experience (up to 3 weapons can be slotted)
- Real-time role swaps at party/guild contents
- Combat strategies based on weapon attributions
- Weapon specific attribution, revamp, skill sets & levelling up available
- Total of 12 weapon types available (6 available at launch)

Lord of Dragons is proud to introduce 'Multi-Weapon System', which is a first for MMORPG. And this is vastly different from simple weapon switching mechanisms from other games.

'Multi-Weapon System' allows players to have 3 different classes of weapons on slots, then freely choose the type of weapons depending on which kind of monsters or other players. Additionally, system allows to acquire weapon skills and revamping those skills through skill points as the character gains level.

Such unique system allows players to have an opportunity to experience multiple classes with just a single character.

Weapon Switching

lord of dragons

# Weapon Types & Attributions

## Sword & Shield - Tanking

Tanking ability like provocation

## Bow - Dealing (Long Range)

Fast & Strong attack from Long Range

## Great Swrod - Hybrid

Tanking and Dealing Mix

## Rapier - Dealing (Short Range)

Fast & Strong attack within Short Range

## Staff - Magic (Long Range)

Heal and wide-area attack

## Dual Sword - Dealing (Short Range)

Assassinate via hide

Core Loop

lord of dragons

# Various In-Game Experiences Available

## Solo Play

### Reward Dungeon

- Field with limited play time
- Exp/Gold as rewards
- Revamp & Magical Stones

### Daily Missions

- 8 daily missions
- Skills/Mastery points
- Exp/Gold/Diamond

### PvP Battle

- Transform/Cape Lottery Boxes
- Honor points / shops
- Weekly ranking rewards

## Party / Guilds

### Boss Dungeons

- 3 daily entrance
- Instance dungeon
- Rare Weapon/Armor

### Chaos Fields

- PvP field for Guilds
- Rare Acc./Cape
- Relic / Relic Shop

### PvE Siege Battle

- Mass Guild contents
- Requires 15+ players
- Practice round before PvP Battle

lord of dragons

## P2E ON MMORPG

LOD provides various in-game monetary assets through NFTs.

LOGT/LORT related items, powerful weapons, skins, consumables and many others will be available.

NFTs that will change in-game experience and elevated user accessibility will also be launching.

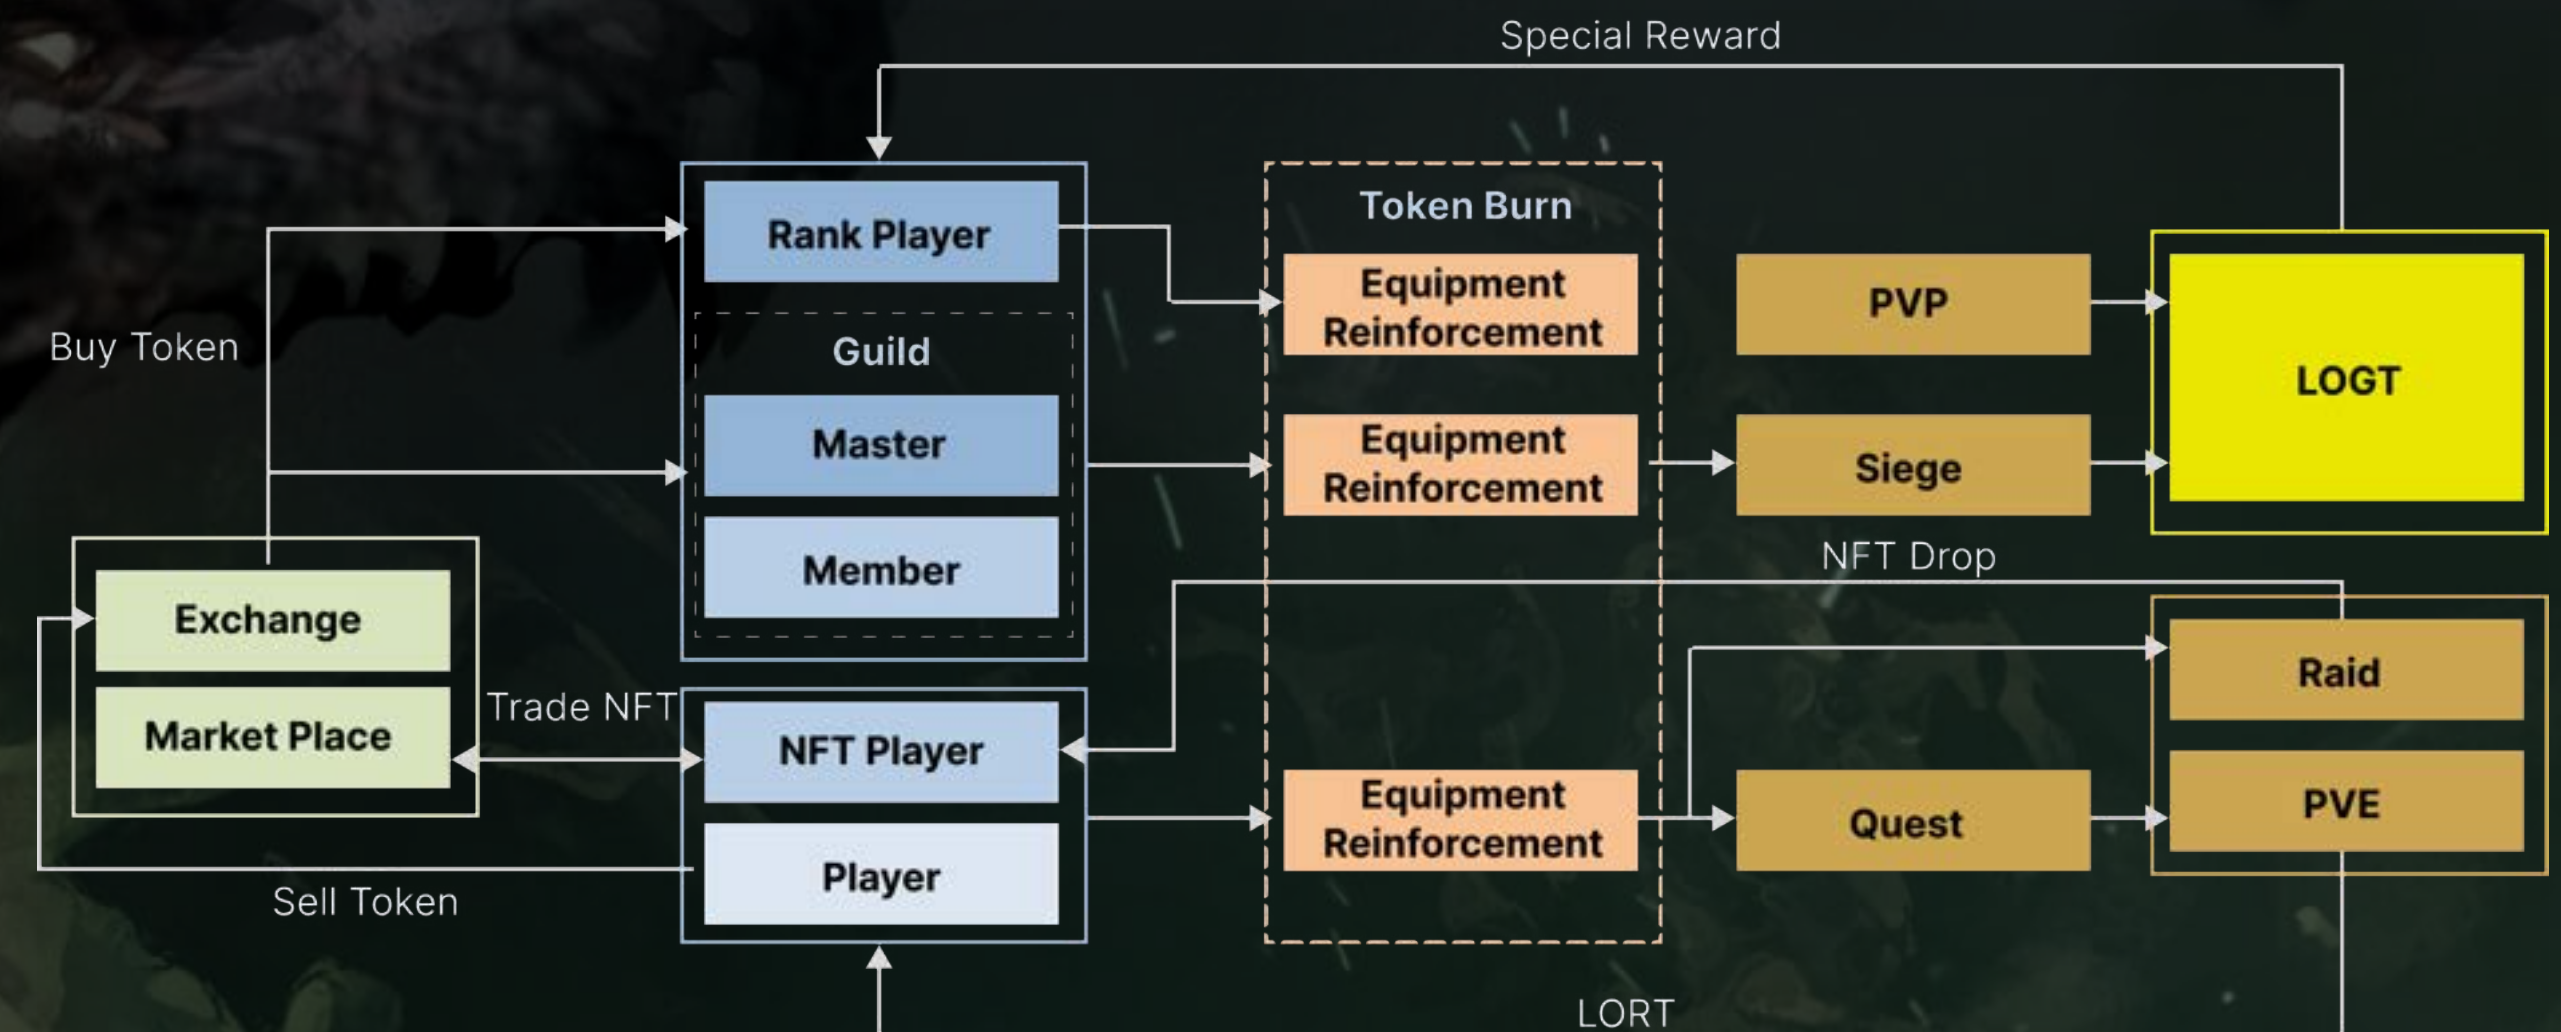

## lord of dragons Ecosystem

Players can choose to play the game for free (F2P), or they can become an NFT player by purchasing NFTs. NFTs allow users to earn more LORTs within the game. Both free players and NFT players can obtain LORTs through various activities such as Party Raids, PVE, and Quests, and have the option to trade their earned LORTs on designated exchanges.

As they play, players can form guilds, participate in party play, and for those seeking to attain higher rankings, strive to become a Rank Player or Guild Master. To strengthen their playable characters, players must purchase LORTs from exchanges and invest them in enhancing equipment, creating a mutually beneficial cycle of supply and demand.

Rank Players and Guild Masters can earn LOGTs through competitive content. LOGTs are utilized to cast a vote on the future policy of the game, and they can also be traded on exchanges for fiat.

LORD

lord of dragons

# LOD Reward Token

Unlimited Qty Issuance,  
BSC Network(Bep-20) Pancake Swaps for  
Listing purposes at BSC DEX

- **Acquisition**  
Complete daily challenges (F2P), Exclusive dungeon for NFT holders.

### Operation 7.8%

78,000,000 10% Unlock at TGE 48 Months Linear vesting for the rest

### Team & Advisors 12%

120,000,000 TGE 5 Months Cliff 36 Months Linear vesting for the rest

### Marketing 15%

150,000,000 10% Unlock at TGE 48 Months Linear vesting for the rest

### Strategic Partnership 8%

80,000,000 TGE 5 Months Cliff 36 Months Linear vesting for the rest(Burn of non-contained supplies)

### Game Incentives/ Staking Reward 45%

450,000,000 60 Months Linear Vesting

# Governance function

LOGT is a governance token that grants holders the right to participate in various decision-making processes within the game's ecosystem. More details about these processes will be released gradually as the game's content is unveiled.

- **Scope of voting influence**

Chaos Field / Great Labyrinth / right to adjust participation time and frequency limits for additional game content

Chaos Field / Great Labyrinth / Right to adjust the number of participations in additional content

- **Voting period**

Voting for important decisions is conducted weekly on Mondays at UTC 00:00, with each voting period lasting for one day (24 hours)

- **Voting Participation Conditions**

Holders of LOGT tokens can exercise one vote for every 200 tokens they hold, but please note that the tokens used for voting will not be burned or recovered.

NFT

lord of dragons

## Non-Fungible Token

### ▪ Race Costume NFT

3 different collections comprised of Beny / Arche / Luchia

### ▪ Specification

Limited Sales Only

Special design applied.

NFT Exclusive Dungeons for additional LORT acquisition

Special racial stats given per weapons (TBD)

### ▪ Detail

Different rarities for collections

Rarity	Additional Daily Reward
Epic	1,200 LORT
Super Rare	360 LORT
Rare	120 LORT
Normal	60 LORT

### Price

Category	Sales Prices (TBC)
Public	149 USD
WhiteList	99 USD
Partnership	80 USD

NFT collections

LORD  
OF DRAGONS

## Introducing LOD NFT Collections

Lord of Dragons is a mobile game that leverages NFT elements to enhance the game's fun and economy.

The NFTs will be issued in three collections, each representing one of the game's three races: Beny, Luchia, and Arche. Additionally, NFTs are classified into four different levels of rarity: Normal, Rare, Super Rare, and Epic.

NFTs provide a variety of benefits, enhancing the gaming experience by offering upgraded appearances and abilities for player characters. When users add an NFT to the game and apply it to their account, their character assumes the appearance of the corresponding race.

Race Weapon Synergy Ability						
Race	Bow	Rapier	Staff	Duble Sword	Sword and Shield	Great Sword
Beny						
Luchia						
Arche						
Detailed figures will be released after the balance test.						

Moreover, NFT holders gain access to exclusive weapon synergy stats for each race. For example, the Benny race excels with Bows and Rapiers, the Luchia race with Staves and Dual Swords, and the Arches with Swords and Shields as well as Great Swords. Players looking to specialize in a particular weapon will require an NFT from a race that matches their preferred combat style..

Additionally, NFTs grant extra stats, such as HP, MP, Movement Speed, and Attack Speed, making them a great choice for users aiming to strengthen their characters. The rarer the NFT, the more stats it provides, which makes them crucial for players who wish to advance quickly and obtain items.

## NFT collections

Additional Ability				
Rarity	HP	MP	Move speed	Aeeack speed
Normal	50	25	0	15
Rare	100	50	10	30
Super Rare	200	100	15	45
Epic	400	200	20	70

Daily NFT Reward Dungeon		
Rarity	1 times	Total (3 times)
Normal	20 LORT	60 LORT
Rare	40 LORT	120 LORT
Super Rare	120 LORT	360 LORT
Epic	400 LORT	1200 LORT

Possessing an NFT allows users, regardless of their race, to access bonus content - the NFT Reward Dungeon - based on their NFT's rarity. Upon completing the dungeon, users can earn additional \$LORT, a primary currency within the game's ecosystem. The scarcer the NFT, the greater the potential \$LORT earnings, rendering NFTs a valuable asset for players striving to progress rapidly and accumulate more in-game rewards.

In summary, the NFT elements in Lord of Dragons are designed to elevate the gaming experience and offer players a means to gain tangible value from their in-game efforts. NFTs provide both aesthetic and functional advantages, making them indispensable for players who seek rapid progression and extra rewards.

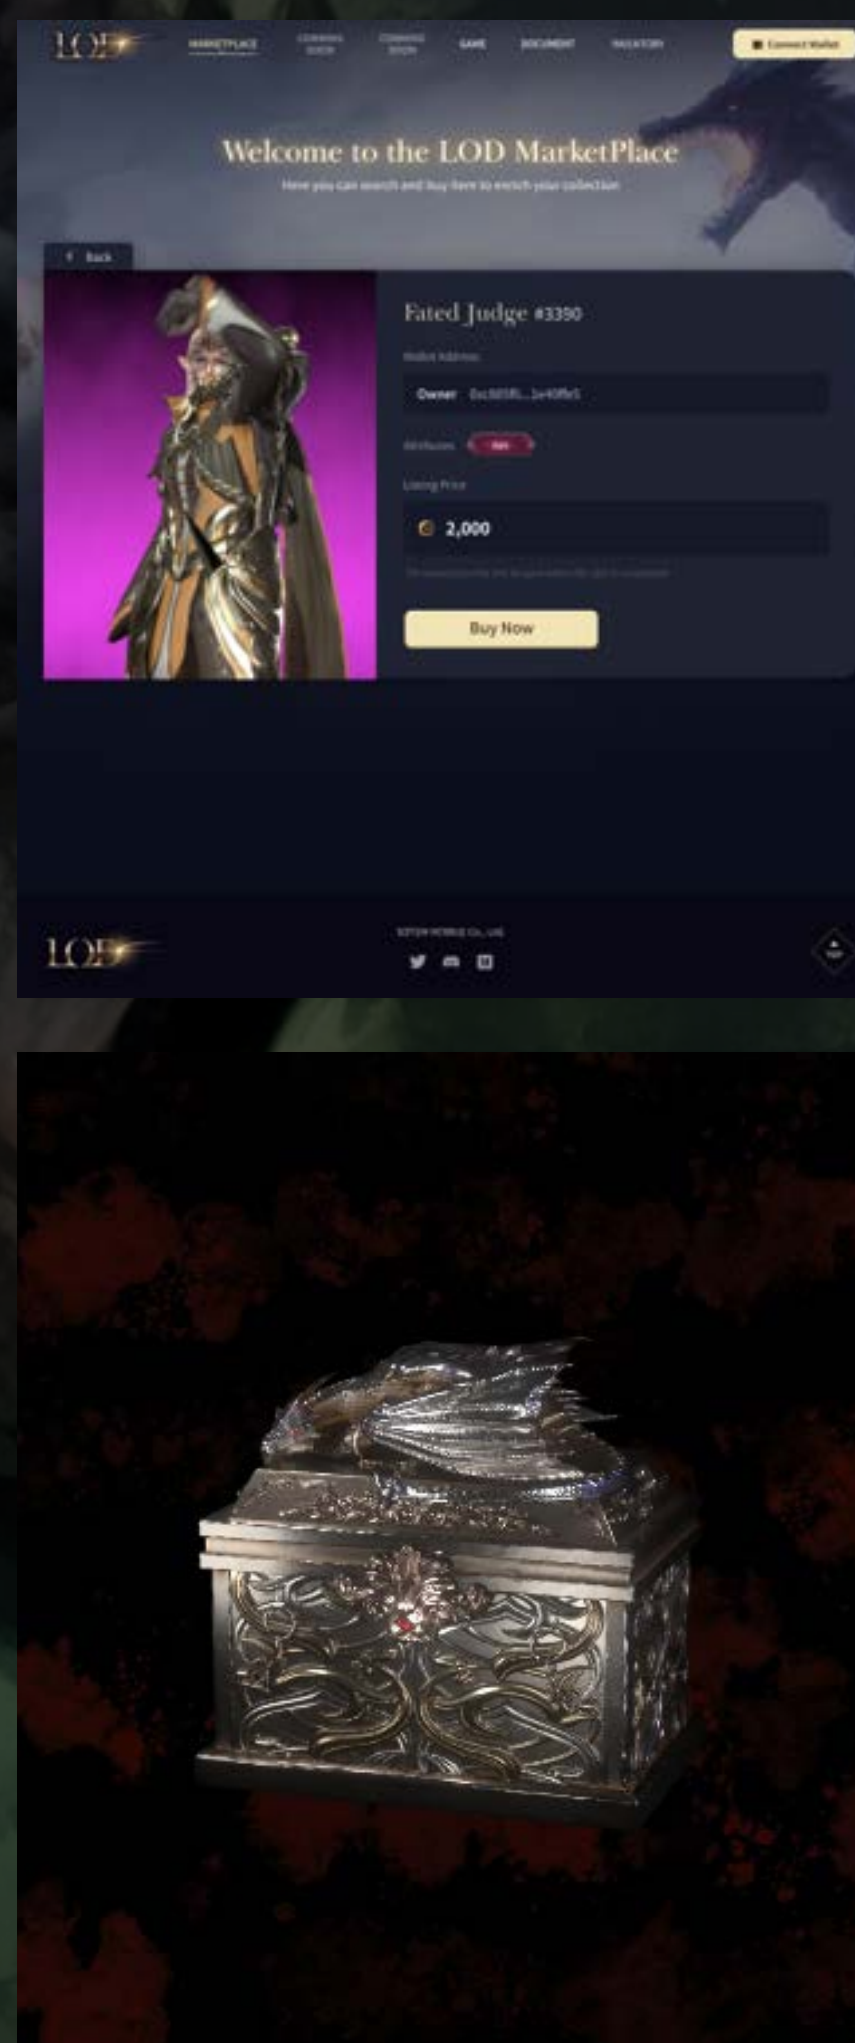

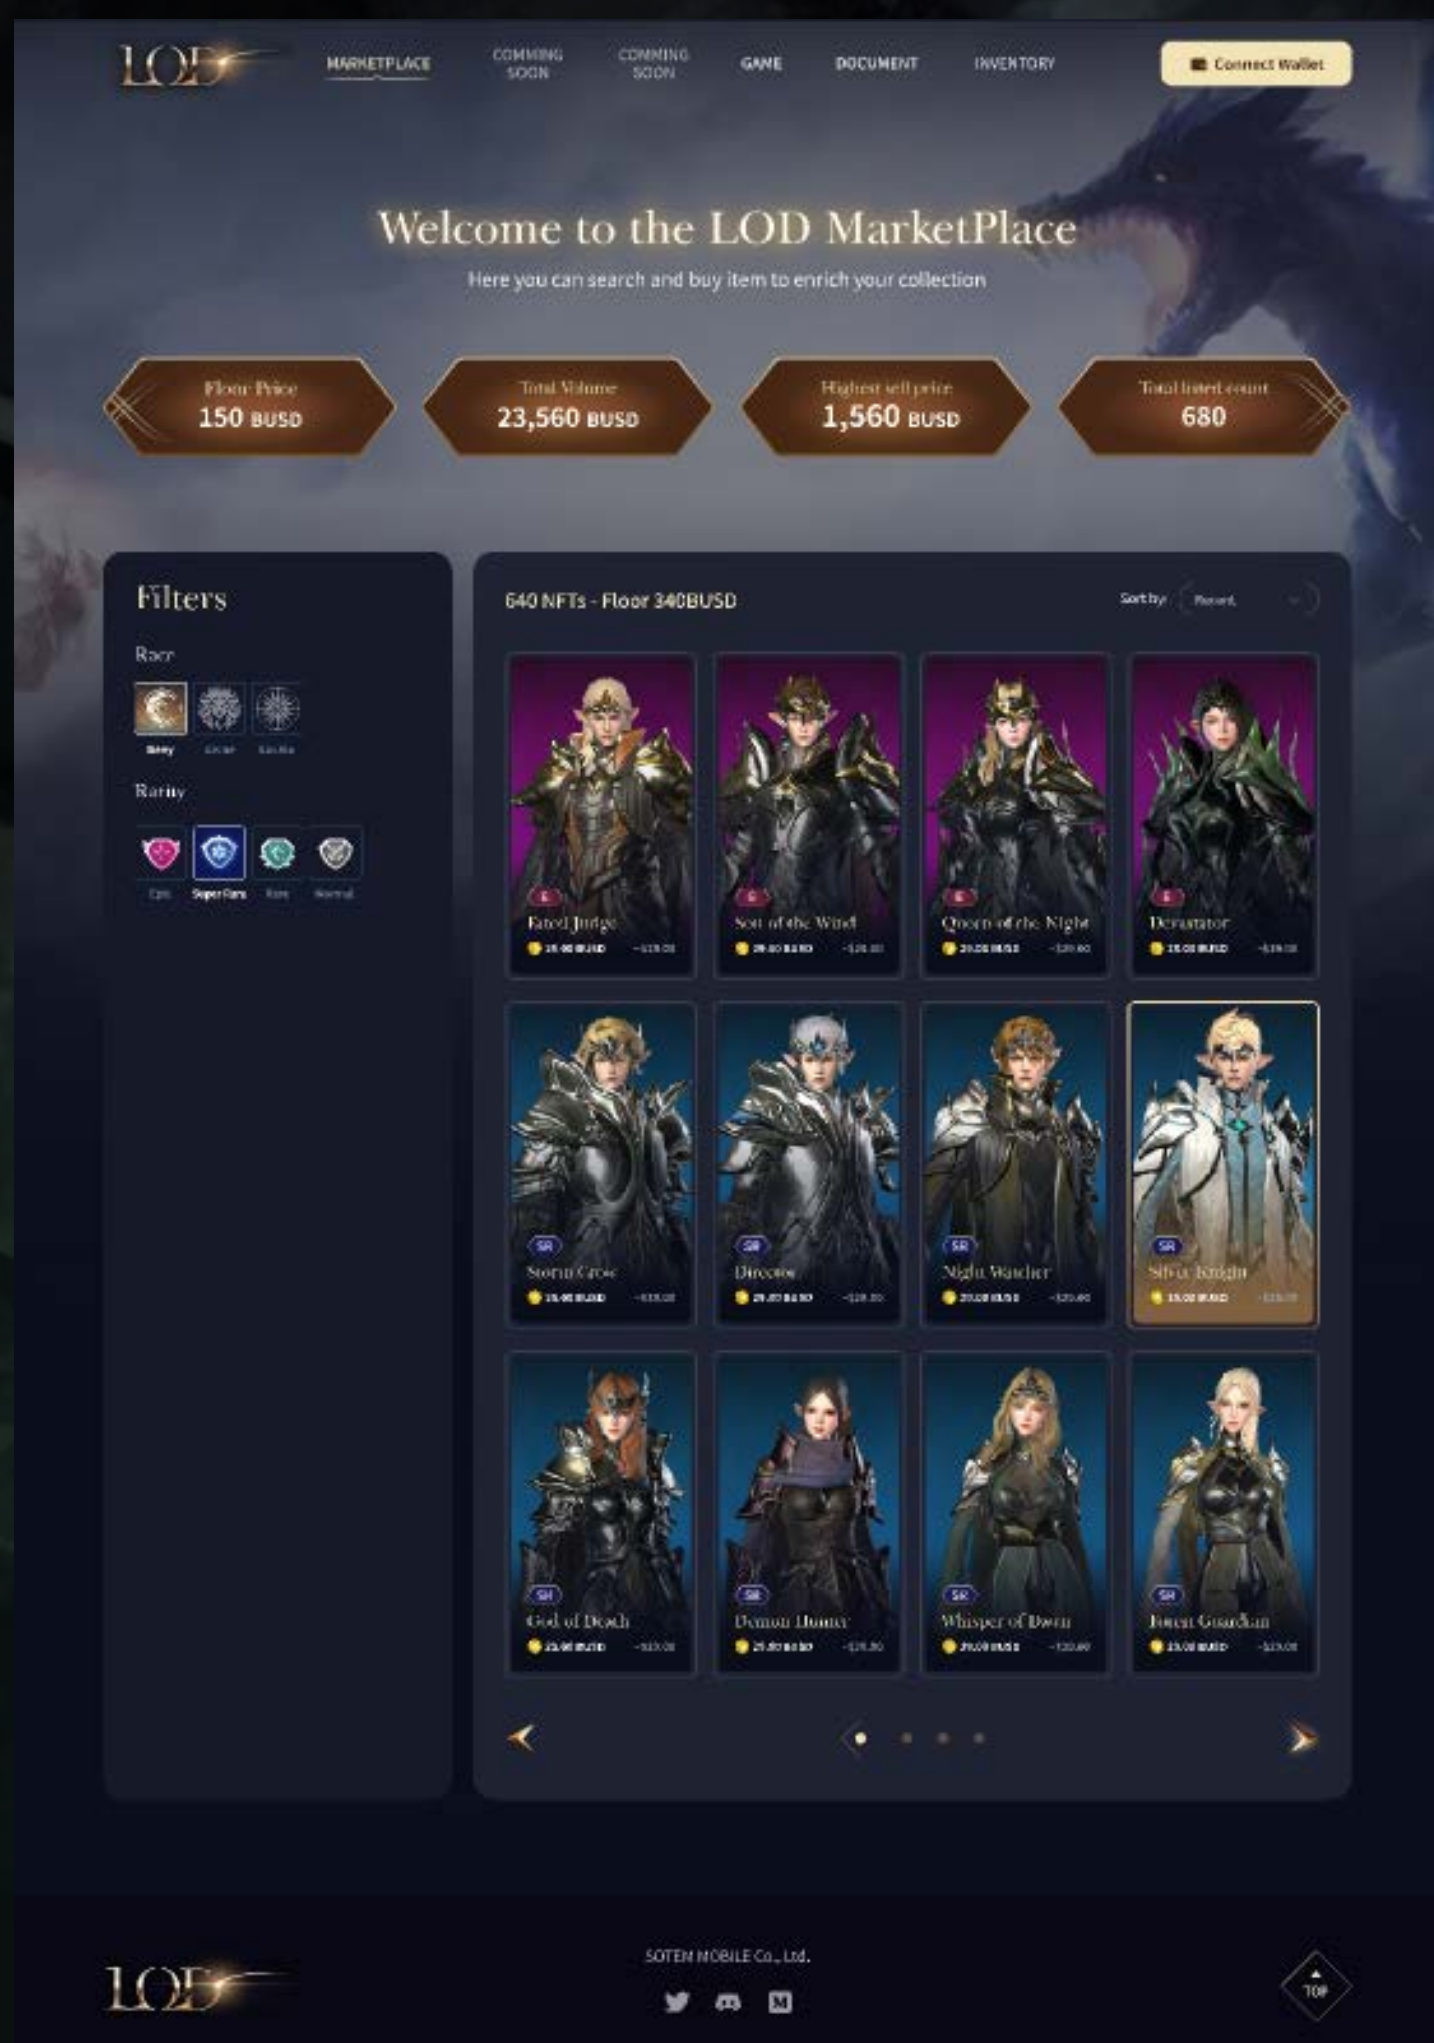

Market Place

## NFT Platform

In-house developed Marketplace will be deployed for users to freely trade NFTs between them. Participants at the marketplace will be able to opt for additional profits outside of in-game environment.

NFTs that will be on sale at the time of game release will provide permanent ownership of offered in-game assets to our users while nurturing the group of top-tier players within the game and ensure all necessary supports and aspects for them to maximize their rewards and benefits through playing the game.

<https://marketplace.lordofdragons.io/>

## Roadmap

This timeline details our funding and development goals

**2022.3Q**

- Closed Beta test(Alpha test has already been completed)
- Launching the Homepage.
- NFT Marketplace.
- NFT Product Planning.

**2022.4Q**

- NFT Sales.
- NFT Marketplace Launch.
- NFT Product Planning.

**2023.1Q**

- BETA TEST
- List on CEX & DEX
- Official Game Launch.

**2023.2Q**

- Leaderboard System
- Special Rewards for Top Guilds and Users
- NFT Meetings for In-Game Balancing(Guilds,Users)
- Balance Updates

## Collaboration Proposal

- **Partnership Collaboration (Guild/Project/VC)**  
Mutual logo exchange and partnership announcements to stimulate growth on each parties' communities
- **Marketing Collaboration(Guild/Project/VC)**  
Advertisement & User Influx Campaign (Guild/Project/VC) to be conducted based on set amount of budget agreed between both parties
- **Investment(Only VC)**  
LOGT Token Investment Partnership  
Discussion to be held, if interested  
(TGE 5 Months Cliff, 36 Months Linear vesting for the rest)
- **NFT Block Deal (Only Guild)**  
NFT Partnership Block Deal (min: 100 qty / 3 months lock-up) (TBC)

Category	Sales Price ( TBC )
Public	149 USD
WhiteList	99 USD
Partnership	80 USD
- **ETC**  
Mutual exchange in marketing efforts between South Korea - Overseas
